

Industrial Heavy Duty 37kW Plastic Granulator – Emmans

PRODUCT INFORMATION:

Make: Emmans

Hopper Opening: 600 x 400mm

Throat: 600 x 420mm

Screen Hole Diameter: 8mm

Power: 415V 37kW

Overall Dimensions: 1350 (l) x 1550 (w) x 2150 (h)

- Runs off a large 37kW motor and has an internal blower.
- Can granulate all types of plastic, copper, rubber, etc.
- The internals are in a sound dampened box.
- Also comes with a spare screen.

SALES SPIEL FROM EMMANS

"Emmans Granulators - offers customization, with special infeed units to suit pipe, profile, sheet, film, bottles, bins, crates, containers, rubber, thermoform, fibres, foam, and with no need of pre-cutting of bulky thick material waste. Pneumatic conveying, cyclones, metal detectors with conveyors, and sound deaden cabinets below regulations."

"Emmans Granulators - ensures best quality and robust design for light and heavy duty applications. With the aid of CAD CAM facilities we provide high accuracy and quality made granulators for size reductions."

"Emmans Granulators - A rotor design to suit your application. Helix scissor form or V-construction or staggered scissor rotors for clean cut low noise positive bite. No fabrication, No comparison"

"Emmans Granulators - Rotor diameter from 300mm to 800mm. Rotor weights from 150kg to 5000kg. Rotor widths from 300mm to 1215mm. Longer on request."

"Easy to access - Quick release screen supports."

"Robust design - Low maintenance."

"High efficiency - Adjustable screen to maintain cutting circle."

"Low noise - Tangential cutting chambers."

"Quick blade change, no adjustable rotary blades required - Limit switches to ensure safety during service and operation."
